Application/Control Number: 10/050,148

Art Unit: 2621

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 13-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to describe the spatial coherency (SC) in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is noted that the spatial coherency is described in the specification from page 8, line 24 thru page 10, lines 6. Many variables are used to define the spatial coherency (SC). However, these variables are not described in such a way as to enable one skilled in the art to and/or use the invention. In particular, the variables COH_Ci, VISITED PELp, TOTAL_NUM_COHERENT, COLOR_OF_MASKED_PIXELk, TOTAL_NUM_COHERENT ++ are not clearly described. Please explain those variables. For example, on page 9, lines 8 of the specification, it is unclear as to what is meant by VISITED PELp = FALSE. On page 9, lines 19-23, the specification states "[f]or the whole pixels PELj in the region R ...the PELj is adjusted to the center of the CCM for the following operations". Why VISITED_PELj is both FALSE and TRUE?

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2621

Qian et al and Huang et al are cited for disclosing the state of the art of color image processing.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (703) 305-4861. The examiner can normally be reached on MON-FRI.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on (703) 308-5246. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
